EDUCATION

University of Nevada - Las Vegas, Honors College

Bachelor of Science: Computer Science

August 2024 - Present

GPA: 3.59 / 4

Coral Academy of Science, Las Vegas, High School

Valedictorian, Class of 2024

May 2024

GPA: 5.14 / 4

TECHNICAL SKILLS

Programming Languages: C++, Lua, JavaScript, Python, Java, HTML, Assembly, SQL

Tools: AWS, React.js, MongoDB, PostgreSQL, Shopify, WordPress, Git, Adobe Suite, Vue.js, Phaser3

Certifications: [AWS Certified Cloud Practitioner](#)

WORK EXPERIENCE

Web Developer | *Calderon Law* (calderonlaw.com)

July 2024 - Current

- Developed and maintained a professional React website for a local law firm, integrating AWS Amplify for hosting, optimizing SEO, accessibility, and mobile responsiveness to enhance user experience.

Kitchen Line Cook | *Mango Mango Dessert*

March 2025 - Current

- Prepared and assembled high-quality menu items in a fast-paced environment, following safety standards, maintaining inventory, and supporting efficient kitchen operations.

PROJECT EXPERIENCE

[makeapost.it](#) — *Full-Stack Social Posting Platform*

- Developed a collaborative digital bulletin board platform enabling users to create and customize virtual post-it notes by selecting size, color, and placement in real time.
- Implemented **OAuth 2.0** authentication and integrated a **PostgreSQL** database using **Supabase** for secure user management, persistent data storage, and real-time updates to support scalable user interaction.

[ScholarChips](#) — *Gamified Attendance Platform (Rebel Hacks 2026, UNLV Hackathon Submission)*

- Developed a full-stack gamified attendance platform where students earn virtual “chips” for consistent attendance, redeemable for prizes such as food vouchers and merchandise.
- Built the application using **React.js**, **Node.js**, and **Express.js**, integrating **Supabase** with **PostgreSQL** for secure authentication, real-time updates, and persistent data storage.

[Calderon Law Website](#) — *Web Application for Client Services*

- Designed and deployed a custom React website for a professional law firm, hosted on **AWS Amplify** for scalable, secure performance.
- Implemented **SEO optimization**, accessibility compliance, and mobile responsiveness to enhance client engagement.

[Personal Portfolio Website](#) — *Full-Stack Web Application*

- Developed a full-stack personal portfolio using **React.js**, **MongoDB**, **AWS Amplify** and **API Gateway** to showcase projects and technical skills.
- Implemented a comment system and contact form with **API Gateway**, **AWS Lambda** and **MongoDB** for secure data handling, enabling user interaction and message storage directly through the site.

RELEVANT COURSEWORK

Computer Science I & II: Program and Algorithm Development in **Python**, Data structures and algorithms in **C++**.

Computer Organization: Organization of digital computers, arithmetic logic, control units and memory organization.

Calculus I & II: Integration, sequences, polynomial approximations, and differential equations with computational focus.

Computational Linear Algebra: Matrices, linear systems, eigenvalues, optimization, numerical methods, and computational algorithms.
